Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2-9002.

Note figure 1. JP 2-9002 shows a head drum assembly having a stationary drum (elements 12 and 20), a flexible printed circuit (20B) having connectors (20C and 20D) that connect the transformer to the main PCB (30) through a hole (not labeled) in the main base (40).

3. Applicant's arguments filed 1/29/02 have been fully considered but they are not persuasive.

Applicant argues that JP 2-9002 does not show (1) the flexible printed circuit to be disposed inside the stationary drum, and (2) the first end of the flexible printed circuit to be "fittingly coupled" to the through hole.

The Examiner does not agree.

Concerning (1), the element labeled as 20 is a part of the stationary drum. The flexible printed circuit is clearly disposed within that part of the stationary drum.

Concerning (2), the phrase "fittingly coupled" is not defined in the specification. Applicant infers that this requires that the connector to completely fill the opening with

an interference fit relationship. However, absent any definition of such in the specification, the Examiner does not agree. The terms used, "fittingly coupled", are read broadly to simply require that the connector be disposed within the opening.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
